

TRI -LINGUAL APPROACH TO EDUCATION

The First Steps offers a truly unique opportunity for children to learn different languages in the same educational environment. There are options for the children to attend courses in German or French during the day, in which they would learn alongside native speaking children.

The German Kindergarten: The First Steps offers a German Kindergarten class, taught by a qualified German teacher, to children aged 2 to 6 years old.

French Kindergarten classes are also available to children aged 2-6 years old, and are taught by a qualified French Teacher.

This is a unique opportunity for native speaking children to continue their linguistic development and for non-native speaking children to learn French or German as a second language.
